CERTIFIED PRACTISING ACCOUNTANTS

## MYOB

MYOB can be your one stop software to manage your invoicing, expenses, GST, Payroll, cashflow and inventory all in the one place.

If you like to control your own data, with a broad range of knowledge of accounting, you could manage your own software data either online using Live Accounts or on your own computer with one of the other programs MYOB has available for businesses.

It is an accountants software package that has been tailored for small business, it is laborious in our opinion and requires dedication and knowledge to allow it to function correctly.
